Experienced Backend developer with **3.5+ years** of experience in the Web development industry. A web developer that is driven by his passion for technology advancement to **continuously learn and solve problems.**

WORK EXPERIENCE

Backend Team Lead,
Carbon XYZ ⬈

03/2022 - Present   *London, United Kingdom*

Achievements/Tasks
- Managed a team of 4 remote backend developers to deliver highly **scalable microservice** in nodejs.
- Coordinated with project manager and create a full backed flow with necessary **AWS service and Database schema.**
- Analyzed blockchain transaction flow and implement new flow which will reduce overall gas charged by 15%.

Project Lead
Webcodegenie Pvt Ltd ⬈

08/2020 - 03/2022   *India*

Achievements/Tasks
- Coordinated with the client for requirements and converted those requirements into modules and tasks. Manage and review team tasks and work on some of the complex tasks.
- Migrated existing monolith applications to microservices and increased performance by 40%-50%.
- Implemented core feature, A algorithm in javascript that will generate call ratio based on agent & leads prior data, which in turn optimize drop ratio a core factor of the project.
- Mentored junior developer, code review.

Software Engineer
Webcodegenie Pvt Ltd ⬈

01/2019 - 08/2020   *India*

Achievements/Tasks
- Worked on multiple projects in parallel to implement features based on SIP js, WebRTC & 3 party APIs like Twilio, Plivo, stripe etc.
- Built **scalable Rest APIs** with full-text search feature based on elastic search and MongoDB.
- Debugged client's old java based application and make it run.

EDUCATION

Bachelor of Computer Engineering
Gujarat Technological University ⬈

2015 - 2019   *GPA - 7.5*

SKILLS

Node JS   MongoDB   Redis   AWS

GraphQL(Appsync)   DynamoDB   Terraform

Docker   Kafka | RabitMQ   Docker Compose

AWS Lambda   AWS ECS   WebRTC

Apache | Nginx   Linux   Express Js

Socket IO   HandlebarJs   Javascript ES6

HTML | CSS | JQuery   CI/CD pipeline

Typescript   GIT   Elasticsearch

PROJECTS

Carbon XYZ (03/2022 - Present) ⬈
- We are building Web3.0 startup a digital platform, where artists can Mint their NFT and add their NFT to the marketplace for auction. A collector can buy or bid on NFT using a meta mask or carbon wallet.
- A carbon wallet is logic wallet where users can send and receive tokens to their wallet and use that token to buy or bid NFT without any gas fee.

Nimbus IO (08/2020 - 03/2022) ⬈
- We have created a full fledged call center system where companies can register themselves and creates their own campaign for outbound and inbound sales with a dynamic drip system base on nodes like Call, SMS, IVR, or RVM. single campaign has multiple dynamic drip base flow.
- Build an algorithm 'Predictive Calling', Which will allow companies to scale calling as per their requirement, so they don't have to worry about the agent availability or efficiency, algorithm will check previous data and create a new calling ratio.

Lead Expert (01/2019 - 07/2022) ⬈
- Generate leads from your website using a block of code that will create a Widget(button), Providing a call feature on your website. The widget has feature's like call now, schedule and message.
- To connect leads with agent we have created multiple flows like call routing, forwarding, and round-robin in js to connect a call to specific departments or users.
